Angela,

You may have seen this photo essay going around on a super mister (see attached Pdf) that has come to my RA's attention.

I have special concern about the misting heads shown in this photo essay. I would like to know why this private citizen has been able to identify so many flagrant violations, and while the PA DEP is doing what??? The EPA needs to take this over. Superfund sites are being created all over PA. See the photos on waste pits that have never been cleaned up. The companies are exempt from Superfund legislation, so who will pay for this massive clean up?
